Subject.

Training course for GCEC-Engineers in Constructed Wetlands Plants

Dear Mr. Christian SCHULZ

Our organization and the participants will all thank you for your interesting and illustrative workshop / training course held at the GCEC headquarter in Damascus, Syria in October 2009.

The participants, mostly engineers in the water-/wastewater-/economy area, profited very much from your know-how and will be able to implement the communicated information.

As we appreciate your competence in wastewater issues and wetland constructing we will revert to it for further cooperation.

Thanks and best regards.

General Director
Dr. Safwan Al Assaf
